## APRIL IS SEXUAL ASSAULT AWARENESS MONTH

Sexual assault is any type of forced or coerced sexual contact or behavior that happens without consent. It includes rape and attempted rape, child molestation, and sexual harassment or threats.

Sexual assault is a serious and widespread problem. Nearly one in five women in the United States have experienced rape or attempted rape at some time in their lives, and one in 67 men have experienced rape or attempted rape.

Sexual violence is often a traumatic event. Experiencing it can affect the way the brain and body work together. To survive, the brain and body have to process things a little differently in crisis mode. It's a survival technique. A survivor's response to trauma is a sign of bravery, resiliency, and strength.

### BEING INVOLVED IS EVERYONE'S RESPONSIBILITY: WHAT CAN YOU DO?

- All of us can create and promote safe environments
- We can intervene to stop concerning behavior
- Promote and model healthy attitudes and relationships; and
- Believe survivors and assist them in finding resources.

The support of friends and family is crucial to the healing journey of survivors of sexual violence. Let survivors in your life know they don't have to walk their path alone.
